LinkedIn

Humbly has been recognized as a positive force that leaves a positive impact on the projects and the people involved. Has an outstanding ability to break down problems and communicate potential solutions.

Ready to embark on the next stage of his career serving others.

EXPERIENCE

Senior Software Engineer & Emerging Leader – (Optum/UnitedHealth Group)

JANUARY 2015 - PRESENT - Boston, MA

In an agile scrum team environment, we deliver high-value software to our business partners, through automated systems to deploy, test, and measure our software.

Notable Achievements:

- Recognized and nominated to join the "**Emerging Leaders Program**"
- Increased the code quality of existing applications using GIT flow, static code analyzers, and automated testing with CI/CD pipelines
- Integrity award recipient
- The team was recognized for leading the organization in innovative public cloud solutions (AWS and Azure)

CIS Alumni Mentor – Bristol Community College

SEPTEMBER 2013 - PRESENT - Fall River, MA

Mentors are enthusiastic about helping the students they mentor succeed and are eager to provide support and encouragement.

.NET Application Developer II – SmartCo Services LLC

MARCH 2010 - DECEMBER 2014 - Taunton, MA

Design, develop and deploy features to high traffic inventory management web application(s) that integrates with several automotive DMS systems while playing a critical role in maintaining and implementing new and existing network infrastructure.

Notable Achievements:

- Delivered product into International markets by localizing ASP.NET application into multiple languages using RESX files.
- Streamlined and improved process time for onboarding new customers by creating a web-based enrollment application process.
- Enhanced the user experience by introducing real-time

SKILLS

Great passion and attention to detail in any technical endeavor

Excellent ability to communicate both technically and non-technically

Natural leader
